-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

- 6) ☐ Other: ____.

Detailed Action

This is the first Office Action corresponding to original filling. The application contains 21 claims.

Drawings

The drawings have been accepted by the examiner.

Claim Objections

Claims 1, 16 and 17 are objected to because of the following informalities: the basket is not a positive element of the combination (see preamble of the claims) but is also recited as a positive element of the combination; for example, in line 4 of claim 1 which reads "[the hook member] is attached to the basket". Appropriate correction is required.

Information Disclosure Statement

Receipt is acknowledged of Information Disclosure Statement, which has been reviewed by the Examiner.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 12, 14, 15, 17, 19 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Hass (Pat No 4,235,407).

The patent to Hass discloses a hanger for a basket, comprising a chain (18, 19), a hook (16) at one end, and being secured to a basket (21) at the other end.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hass. Regarding claim 13, it has been held to be within the general skill of a worker in the art to make plural parts unitary and viceversa as a matter of obvious engineering choice. As to claim 20, the hanger shown by Hass could be used with a wire basket, or any other basket known in the art.

Claims 2-11, and 16-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hass in view of Steen (Pat No 3,184,203). The patent to Steen discloses another hanger comprising a chain defined by a rigid rod (14) and a chain (16). It would have been

obvious to one of ordinary skill in the art at the time the invention was made to have provided the device shown by Hass with a chain comprising a rigid part and a flexible part as shown by Steen to provide for a more versatile hanger. It is note that in the instant invention the load of the weight of the basket is carried by the rigid rod, and the chain is more an aesthetic feature. The length of the flexible chain, attaching points, etc is considered to be matter of engineering choice. As to claim 11, the recited structure is the one typical of a chain.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Norman (3,382,819), Elliot (4,506,475) and Rocquin (4,385,742) show other devices of interest.
